Gourav Suman

Full-stack developer · AI apps

gouravsuman2006@gmail.com

Hi, I'm Gourav, a full-stack developer with about a year of experience as a software developer. I build complete web apps, from React front ends to Node.js APIs and databases, and I love putting AI to work in real products. I've built a hospital insurance claim checker, an AI résumé analyzer, an AI UGC video generator and a vibe-coding app that builds SaaS apps and websites. I work fast with AI tools like Claude Code, Codex, Cursor and Base44.

Work Experience

Full-Stack Developer (AI)	App Building Studio	2026–Present
- Built domain systems for managing and connecting custom domains. - Developed an AI-powered UGC video generation platform. - Built a vibe-coding app and website builder. - Developed an AI movie generation app.		

Projects

Insurance Claim Verifier (for hospitals) Hospital claim staff upload a patient's claim documents. The app reads them with AI, checks each one for missing fields, and compares details across documents, for example a policy number that doesn't match or "Jasvinder" vs "Jaswinder". Mistakes get caught before the claim goes to the insurer. It flags issues for a person to confirm and never approves or rejects a claim by itself. Tech: React 19, Vite, Ant Design, Node.js, Express 5, MongoDB (Mongoose), Zod, Multer, session login with bcrypt, Claude and Gemini models for reading documents, Docker.
AI Résumé Analyzer Upload a résumé and get instant AI feedback: a score, missing keywords, formatting problems and tips to make it stronger for the job you want. Tech: React, Tailwind CSS, Node.js, AI model API, PDF parsing.
AI UGC Video Generator Turns a product and a short brief into user-generated-content style video ads, with an AI-written script, voice and scenes. No camera or actors needed. Tech: React, Node.js, AI text, voice and video APIs, Remotion.
AI App Builder (vibe coding) Describe an app in plain words and it builds it: SaaS apps and websites with working code and a live preview. Tech: Next.js, Node.js, AI model APIs, live code preview.

Education and Certifications

- Bachelor of Computer Applications, University of Kota

Skills

Frontend	React, Next.js, Vite, Tailwind CSS, Ant Design, GSAP
Backend	Node.js, Express, REST APIs
Database	MongoDB (Mongoose)
AI	Claude API, Gemini API, AI model integration, AI document reading

Video	Remotion
Tools	Git, GitHub, Docker, Render, Postman
AI coding tools	Claude Code, Codex, Cursor, Base44

Strengths

- Proficient in building interactive and responsive web applications
- Strong understanding of UI/UX design principles
- Knowledge of game development
- Quick learner and adaptive to new technologies
- Problem-solving skills and debugging expertise
- Team player with good communication skills
